Compact Results in a Two-Column Paper

gradbars example

1 Evaluation

The table reports illustrative accuracy scores. All rows use the same scale from zero to 100; the bars are placed directly in the numeric column.

Table 1: Accuracy (%). Shared range: 0–100.

Model	Accuracy
Baseline	72.4
Compact	81.6
Proposed	92.7
Unavailable	–

2 Interpretation

A longer bar indicates a larger score. Missing values are displayed separately from zero. Column headings bypass numeric collection with multicolumn.

3 Uncertainty

Intervals should be described in the caption. These illustrative intervals are supplied directly; the package does not estimate uncertainty.

Model	Score and interval
A	72.0
B	89.0
